

PRAJAKTA SHEVAKARI

+1 (443) 401-8792 | prajaktashevakari@gmail.com | Baltimore, USA | Willing to relocate | <https://www.linkedin.com/in/prajakta-shevakari/>

PROFESSIONAL SUMMARY

- Senior Software Engineer and MS in Computer Science candidate at Johns Hopkins University with strengths in backend development, distributed systems, cloud infrastructure, and applied machine learning.
- Experienced in building scalable fintech systems and deploying ML solutions in academia, emphasizing reliability, security, and resilience.

EDUCATION

Johns Hopkins University

Expected May 2026

Master's, Computer Science

Current GPA: 3.7

- Artificial Intelligence, Machine Learning, Natural Language Processing, ML: AI System Design & Development, Human Language Technology Software System Design, Parallel Computing for Data Science

Savitribai Phule Pune University

August 2013 - May 2017

Bachelor's, Computer Science

GPA: 3.8

- Data Structures and Problem Solving, Cloud Computing, Business Analytics and Intelligence, High-Performance Computing, Computer Networks, Advanced Computer Programming, Design and Analysis of Algorithms

SKILLS

- AI / Machine Learning:** LLMs (Large Language Models), Transformer, Natural Language Processing (NLP), Neural Networks, Deep Learning, Prompt Engineering, Python, Pytorch.
- Distributed Systems & Cloud:** AWS (EC2/S3/Lambda), Apache Kafka, Microservices, RESTful API, Java, Spring Boot/Hibernate.
- Concepts:** System design, distributed systems, data engineering, MLOps (training/serving/monitoring), parallel/HPC.
- Development & DevOps:** Java, Bash, Git, Jenkins, TeamCity, Maven, Chef, Jupyter, ETL, HTML/CSS, JavaScript, Node.js, JUnit.
- Data & Business Intelligence:** Apache Spark, SQL, Power BI, Yellowfin BI, Splunk.

PROFESSIONAL EXPERIENCE

Johns Hopkins University – Office of Digital Transformation

Baltimore, MD

Software Engineer Intern

June 2025 - August 2025

- Developed Python automation tools, GUI apps, and validation systems serving 200+ faculty members across multiple JHU departments.
- Partnered with senior staff across university systems to design, build, and maintain internal HR tooling, automating the data cleanup workflow and improving efficiency by 25% through process automation and script optimization.

Barclays

Pune, India

Lead Software Engineer

April 2023 - May 2024

- Led design and development of an AngularJS + REST executive dashboard that turned 1M+ daily transactions into actionable insights for back-office leaders.
- Automated DR deployments via Autosys-scheduled SCP with TeamCity/Chef, cutting release time from 4+ hours to under 10 minutes.

JPMorgan Chase

Mumbai, India

Software Engineer III

October 2021 - April 2023

- Delivered 15 APAC releases while strengthening operability: redesigned legacy modules for resilience and easier debugging, introduced structured logging, proactive alerts, and runbooks, and reduced MTTR by 70% (from 6 days to under 2).
- Led the cloud migration of terabyte-scale regulated data from on-prem to AWS (S3, EC2), with reconciliation to ensure data integrity.
- Built a high-throughput Java + Apache Spark enrichment engine that ingests GBs/day from AWS sources, generates reports, and stores it.
- Completed 7 POCs in 30 days to de-risk service boundaries and data contracts, finalizing a microservices architecture that underpinned the AWS migration and Spark enrichment pipeline.

FIS Global

Pune, India

Software Engineer

July 2017 - October 2021

- Built and maintained middle-office pipelines for trade processing and data transformation with high availability and governance.
- Managed and delivered over 90 weekly software releases as Release Manager, maintaining a 95% on-time delivery rate while rigorously prioritizing showstopper defects and ensuring high quality.
- Built a static bulk-upload capability that cut manual effort by 10+ hours/week and reduced reference-data errors by ~90%; recognized with the Above and Beyond award.

PROJECTS

Machine Learning Engineer

Aug 2024 - May 2025

- D-FuseSmileNet - Deep Learning for Spontaneous Smile Recognition: Built a transformer-based classifier with Hadamard fusion of D-Marker (handcrafted) and learned features; achieved state-of-the-art results on four datasets (UvA-NEMO 88.7%, MMI 99.7%, SPOS 98.5%, BBC 100%) and outperformed prior deep-learning methods by 0.8 to 5.0 percentage points.
- Clinical NER with LLMs and Chain-of-Thought Prompting: Built a few-shot, CoT-guided annotation pipeline for Bengali clinical text; CoT raised annotator token-level F1 from 0.120 to 0.335, and downstream BanglishBERT trained on the synthetic labels reached 46.0 macro-F1 on Bangla-HealthNER, eliminating manual labeling.

ACADEMIC LEADERSHIP AND TEACHING

- Head Course Assistant, Software System Design (Fall 2025)
- Course Assistant, Operating Systems (Spring 2025)
- ILLD Fellow (Integrative Learning and Life Design, Software Engineer - Python) (Fall 2024 - Present)

EXTRACURRICULAR ACTIVITIES

• Diploma in Bharatanatyam

• Hiking

• Iyengar Yoga & Meditation
